TiVo Corp. is committed to sourcing components and materials from companies with shared values around human rights, ethics, and environmental responsibility. To that end, TiVo is working with our global supply chain to ensure compliance with the Securities and Exchange Commission’s (“SEC”) conflict minerals rules. We have established a conflict minerals compliance program that is designed to follow the framework established by the Organization for Economic Cooperation and Development (OECD). TiVo plans to utilize its implemented compliance program to improve supply chain accountability.

TiVo does not purchase metals directly from smelters or mines. We must rely on source information provided by our suppliers. TiVo requires that suppliers whose products contain tantalum, tin, gold, and tungsten submit information as to usage and sourcing utilizing a standard Conflict Minerals Reporting Template. If we become aware of a supplier whose supply chain includes metals from a conflict source we will take appropriate actions to work with our suppliers to remedy the situation. TiVo.

We are committed to the safety, health and protection of people and the environment worldwide.
